

# Gateway Women's Care Center Nurse/RDMS

## Reports to Nurse Manager and Director of Client Services

### Major Responsibilities

#### **Nursing/Medical Care:**

1. Perform limited obstetrical ultrasounds – training will be provided if needed
2. Act as Client Advocate when needed
3. Perform pregnancy test, Woman's Right to Know education
4. Provide nursing/medical care, assessing client needs and making judgements which reflect safe nursing practices as pertains to pregnancy resource centers
5. Provide education for client and family to develop an understanding of their health conditions related to pregnancy
6. Handle medical questions from callers and clients
7. See that medical equipment is functioning properly

#### **Public Relations:**

1. Represent Gateway Women's Care in the community when called upon
2. Attend medical conferences offering professional training and information pertinent to Gateway's practices

#### **Personal Development:**

1. Maintain professional license and required CEUs
2. Increase knowledge of management, obstetrical and gynecological care and women's health issues.
3. Maintain a working knowledge of nursing methods, principles and practices in relation to the prevention and treatment of diseases, and safety and infection control.
